SUMMARY

Computer Engineering graduate passionate about software development, problem-solving, and exploring emerging technologies. I enjoy learning by building practical applications, experimenting with new tools, and turning ideas into working solutions. Through my internship and personal projects, I have gained hands-on experience in full-stack development, AI-powered applications, and computer vision. I am eager to take on new challenges, learn from experienced engineers, and continue growing as a software developer while contributing to meaningful projects.

SKILLS

Programming Languages: TypeScript, JavaScript (ES6+), Python, Java, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Bootstrap 5, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL, SQL Server, IndexedDB, PostgreSQL

AI & LLM: OpenAI API, Google Gemini API, LLM Integration, AI Automation

Developer Tools: Git, GitHub, Vercel, Power BI, Microsoft Excel, VS Code, Postman

EXPERIENCE

AzeelaAI Labs — *Dec 2025 – Present*

Software Development Intern

K2 Chicken Commercial Ordering Platform (Live Site)

- Built a responsive online ordering platform to replace manual WhatsApp-based order collection and simplify the customer ordering process.
- Developed product browsing, cart management, checkout validation, and mobile-responsive interfaces.
- Helped reduce order processing time from 8 minutes to under 2 minutes through a streamlined digital ordering workflow.

K2ChickenPOS - Offline-First POS System

- Developed a full-stack POS system used across 3 franchise locations for billing, inventory, customer management, loyalty, and reporting.
- Implemented an offline-first architecture using IndexedDB and cloud synchronization to supports billing during network outages.
- Designed REST APIs and database workflows supporting 50–80 daily transactions and automated inventory reconciliation.

AI Business Opportunity Analyzer (Internal AzeelaAI Tool)

- Built an AI-assisted workflow to analyze business websites, Google Business Profiles, and customer reviews to identify digital transformation opportunities.
- Integrated AI capabilities with backend APIs to transform business research into structured reports and actionable recommendations.
- Developed automated research workflows, reporting dashboards, and lead-management features to support business analysis.

PROJECTS

Delphin Business Consulting Website (Live Site) — **Jul 2026 - Sep 2026**

HTML5, CSS3, JavaScript, Bootstrap 5

- Developed a responsive business website showcasing consulting services across technology, finance, operations, marketing, and automation.
- Built structured sections for services, case studies, selected work, and business insights, along with interactive UI components and user-friendly navigation.

AI-Based Traffic Violation Detection System — **Jan 2026 - May 2026**

Python, OpenCV, Machine Learning

- Developed a computer-vision pipeline to detect red-light violations and helmet compliance from CCTV footage.
- Experimented with image preprocessing and object-detection workflows to improve automated traffic violation detection.
- Improved measured detection precision from 72% to approximately 90% on a 500-image evaluation dataset.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering (Computer Engineering) — **2022 – 2026**

Genba Sopanrao Moze College of Engineering | Savitribai Phule Pune University

CGPA: 8.75/10

Java Full Stack with ReactJS

IT Shaala Institute | 2024 - 2025

ACHIEVEMENTS & LEADERSHIP

Founder & Vice President — VAMINT Coding Club

- Built a coding community of 30+ members and organized 8+ technical workshops and three inter-college coding competitions, encouraging technical learning and collaboration.

Technical Event Organizer — 2026

- Planned and coordinated five technical events involving more than 200 participants, managing logistics, branding, and volunteer coordination.
