SUMMARY

Computer Engineering graduate (CGPA: 8.75/10) interested in full-stack development and AI-powered software. I like learning new technologies by building practical applications and understanding how they can solve real-world problems. As part of my internship at AzeelaAI, I have worked on web platforms, a full-stack POS system, and an AI-powered business analysis tool using React, Next.js, Node.js, TypeScript, Python, and SQL.

SKILLS

Programming Languages: TypeScript, JavaScript (ES6+), Python, Java, SQL
Frontend: React.js, Next.js, HTML5, CSS3, Bootstrap 5, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Databases: MongoDB, MySQL, SQL Server, IndexedDB, PostgreSQL
AI & LLM: OpenAI API, Google Gemini API, LLM Integration, AI Automation
Developer Tools: Git, GitHub, Vercel, Power BI, Microsoft Excel, VS Code, Postman

EXPERIENCE

AzeelaAI Labs **Dec 2025 – Present**
Software Development Intern
K2 Chicken Commercial Ordering Platform (Live Site)

- Developed a responsive online ordering platform, replacing manual WhatsApp-based ordering.
- Built product browsing, cart, checkout, validation, and mobile-responsive interfaces.
- Reduced order processing time from 8 minutes to under 2 minutes.

K2ChickenPOS - Offline-First POS System

- Developed a full-stack POS system used across 3 franchise locations for billing, inventory, customer management, loyalty, and reporting.
- Built an offline-first architecture using IndexedDB and cloud synchronization, enabling billing during network outages.
- Designed REST APIs and database workflows supporting 50–80 daily transactions and automated inventory reconciliation.

AI Business Opportunity Analyzer (Internal AzeelaAI Tool)

- Developed an AI-powered workflow to analyze business websites, Google Business Profiles, and customer reviews and identify digital transformation opportunities.
- Built automated research workflows, AI-generated reports, solution recommendations, dashboards, and lead-management features.
- Integrated AI capabilities with backend APIs to convert business research into structured opportunities and actionable recommendations.

PROJECTS

Delphin Business Consulting Website (Live Site) **Jul 2026 - Sep 2026**
HTML5, CSS3, JavaScript, Bootstrap 5

- Developed a professional business website showcasing technology, finance, operations, marketing, and automation solutions.
- Built responsive and structured sections for services, case studies, selected work, and business insights.
- Implemented interactive UI components and client-focused navigation using JavaScript.

AI-Based Traffic Violation Detection System **Jan 2026 - May 2026**
Python, OpenCV, Machine Learning

- Developed a computer vision pipeline for detecting red-light violations and helmet compliance from CCTV footage.
- Implemented image preprocessing and object detection pipelines for automated traffic violation detection.
- Improved detection precision from 72% to approximately 90% on a 500-image evaluation dataset.
- Designed an automated computer vision workflow to reduce manual CCTV monitoring.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering (Computer Engineering) **2022 – 2026**
Genba Sopanrao Moze College of Engineering | Savitribai Phule Pune University
CGPA: 8.75/10
Java Full Stack with ReactJS
IT Shaala Institute | 2024 - 2025

ACHIEVEMENTS & LEADERSHIP

- Founder & Vice President (VAMINT Coding Club)**
Founded and grew a coding community of 30+ members while organizing 8+ technical workshops and 3 inter-college coding competitions.
- Event Organizer (2026)**
Planned and coordinated five technical events involving more than 200 participants, managing logistics, branding, and volunteer coordination.
